Security Overview

Magnificentech Solutions Ltd trading as TrustVerify

Owner: Michael Omotayo, Founder and DPO · Review edition, 8 Nov 2026.

Our security approach includes a private source repository, pull requests, full install/build/tests, founder written approval before production changes, backups and rollback checks. Administrator multi-factor authentication is mandatory. Dependency alerts and free security scans support vulnerability review. Public policies describe our approach; they are not an independent assurance report or a promise that every risk has been removed.

Publication status: proposed public edition awaiting founder approval. Review at least annually and after material change. This document makes no external assurance claim.
